

MEDIUM DENSITY RESIDENTIAL BUILDINGS

An important goal of the community for An Camas Mòr, especially at the initial stage, is to deliver lower cost homes. The medium density area would offer the possibility for detached and semi-detached homes with gardens with the economy of a smaller plot and the advantageous location close to the High Street. Key to these designs would be having the house in one corner of the site, close to the street and right up to the site boundary at the side.

The following are studies for house types with opportunities for expansion, flexibility and change. The studies recognise the aspiration for a detached house, the possibility of home working, and incorporate on-site parking for one or two cars as well as out-buildings and space for outdoor activities.
