

CHRISTMAS FAIR AT THE MAIN CROSS

As the community's most important space in the settlement, the Main Cross would be particularly carefully designed, to enhance the life of the community at all times of the day and year. This would be assisted by being suitable for use as a market square and an outdoor arena, using the slight south-facing slope of the ground. Narrowing the street at both ends and keeping the buildings on the south side lower than the north side would assist. The square would be very suitable for buildings with public and non-residential commercial uses, as well as for residential properties. The buildings would also be very carefully designed to reinforce shelter and attract the sun, perhaps through the use of a colonnade.
